

THE HEART OF THE HOME

SILESTONE
by Cosentino

OUR GOAL IS TO CREATE A CLEANER KITCHEN

• CLEANER AIR

A proper cooking ventilation system that removes pollutants from the kitchen environment to the outside of the house before they spread to the rest of the home

• CLEANER WATER

A water purification system that delivers pure clean filtered water to the kitchen for drinking and cooking purposes

• CLEANER COUNTERTOPS

Silestone Quartz® countertops with built-in Microban antimicrobial product protection to resist the growth of odor-causing bacteria, mold and mildew. While Microban protection does not protect users against foodborne illness and does not replace the need for normal cleaning practices, it does make the countertops easier to clean and keep cleaner

So much of daily life takes place in the kitchen, it is truly the heart of the home. From planning, preparing and eating meals, to doing homework, entertaining, and managing the home, the kitchen plays a key role in your everyday life.

Ashton Woods Homes presents **Terravista**, the first new community in Houston to use **The Cleaner Kitchen™** Program from **Silestone Quartz®** as a construction standard. This program is an award-winning system that makes cleaning your kitchen—and keeping it clean—so much easier.

Terravista is one of the most prestigious gated master-planned communities in Houston, and if you act now, you take advantage of our pre-sale pricing.

Welcome to Terravista.
